DunnEasy™ Idler

Proven in Coal, Metaliferous
Mining and Ports.

ABN 7 111 471 802

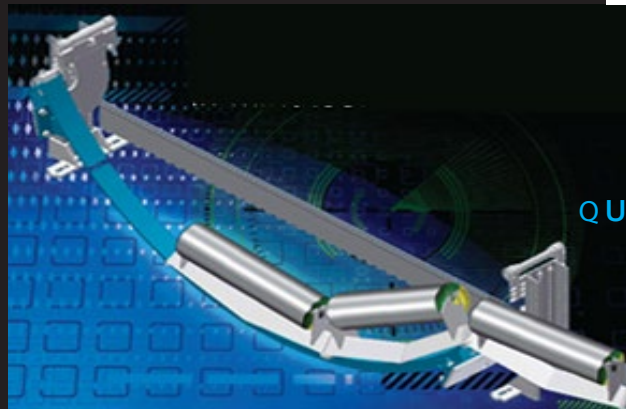

S A F E R

Conveyor Idler roll change-outs - now without even lifting a conveyor belt!

The iFrame Assembly replaces a fixed idler set
conveyor structure. Effectively heightens
safety and productivity.

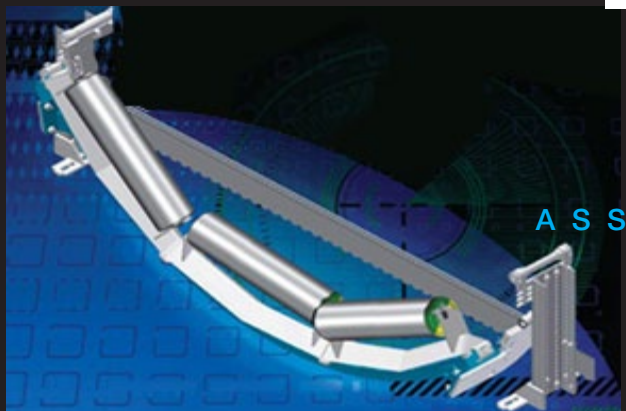

Conveyor Idler roller change-outs are not only
safer and faster - they can be done in less than
5 minutes using standard tools.

Q U I C K E R

Fast and efficient change-outs save valuable company resources

Designed to simply 'bolt in' to existing structures
with minimum fabrication. Vastly improves
dangerous 'roll change-out' by using cranes and
harnesses for elevated work situations.

A S S E M B L Y

Assembly designed to promote Safe Work Practices & Procedures

iFrame Assembly is supplied in stainless steel.

Drop the assembly down from the safety on
one side of walkway. Our compact standard
tool kit increases productivity and safety
of use in the assembly process.
